

bringing together thinking on Defence AI

Our **mission** is to connect Defence opportunities with next generation AI solutions.

Our **vision** is that by empowering innovation and collaboration across diverse national AI capabilities, we will develop safe and secure AI solutions to provide advantages for Defence.

Our **objectives** are:

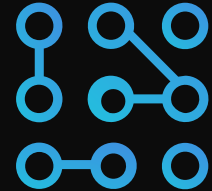

### people & talent

Sustain a talent pipeline to grow domestic AI capabilities and Defence AI-ready specialists.

### research impact

Support R&D and provide the platform in which AI-users work alongside researchers and developers.

### integration & evolution

Bring together and support the broader Defence and AI ecosystems.
