

Dr Truyen Tran

**Head of AI, Health and Science, Applied Artificial Intelligence Institute (A212)
Deakin University**

Dr. Truyen Tran is a Full Professor at Deakin University, Australia, where he leads a world-class team developing robust human-compatible Artificial General Intelligence (AI Future).

This technology is then leveraged to accelerate science and engineering (AI4Science) and improve health outcomes (AI4Health). AI Future envisions AI agents as a new digital species integrated into our society, equipped with advanced reasoning and planning capabilities while maintaining robust alignment with human values. His AI4Science research program develops AI Scientists spanning all STEM fields, while the AI4Health program focuses on clinical prediction, medical image analysis, and Generative AI for healthcare.

Dr. Tran has received multiple international awards for his significant research contributions. He obtained his BSc degree from the University of Melbourne in 2001 and a PhD in Computer Science from Curtin University in 2008.
